This task involves performing exploratory data analysis on a dataset.Create visualizations to understand the distribution of variables, identify outliers, and check for correlations between variables.

```
import pandas as pd
import numpy as np
import matplotlib.pyplot as plt
import seaborn as sns
```

```
data = pd.read_csv("/content/USvideos.csv")
```

```
data.shape
```

```
(40949, 16)
```

```
data = data.drop_duplicates()
```

```
data.info()
```

```
